Systems Thinking...

Why do we need it?

Who is it for?

What is it?

How do we do it?

System 1 Thinking Fast & Wrong A Lot

System 1 Thinking
Fast & Wrong A Lot

System 2 Thinking
Slow & Right More Often

System 3 Thinking

Fast & Right More Often

System 1 Thinking

Fast & Wrong A Lot

System 2 Thinking

Slow & Right More Often

Fast & Adaptive Thinking

Cognitive **Complexity**
(Systems Thinking)

Complex Adaptive Environments

Material **Complexity**
(Systems Science)

a.k.a. SMART

**The ability to organize
information to adapt to reality**

“Insights into our own thoughts, or metacognition, is key to high achievement in all domains”

(Scientific American Mind, Fleming, 2014)

If you want to develop
emotional intelligence, you'd
be better to train in
metacognition than emotional
intelligence

Smart is no longer possessing information. Smart is the ability to **organize** information to adapt to reality.

Information

aka, content
data

Information & Organization

aka, content
data

aka, thinking
encoding
cognition
structuring
DSRP

Information & Organization = **Meaning/
Mental Model**

Information & Organization = Meaning/
Mental Model

Predictions
Decisions
Behavior

Information

aka, content

M = IO
DSRP

4 SIMPLE ORGANIZING RULES

DISTINCTIONS (D)

identity (i)

other (o)

SYSTEMS (S)

part (p)

whole (w)

RELATIONSHIPS (R)

action (a)

reaction (r)

PERSPECTIVES (P)

point (p)

view (v)

Smart is no longer possessing information. Smart is the ability to **organize (DSRP)** information to adapt to reality.

Pre and Post D Group

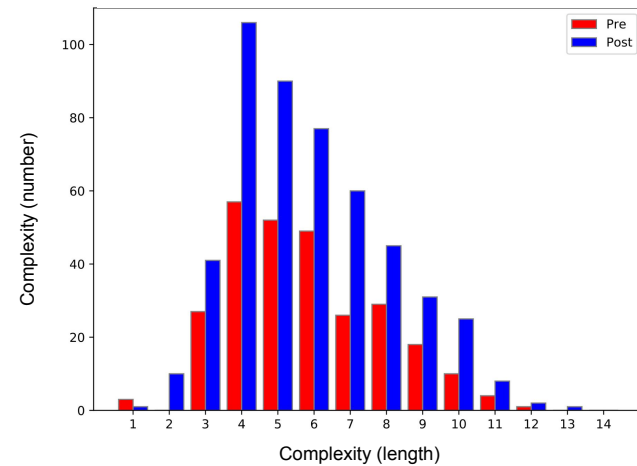

Pre and Post S Group

Pre and Post R Group

Pre and Post P Group

MORE | BETTER

You are **already** & **always** doing DSRP.

You are **already** & **always** doing DSRP.

Reality is **already** & **always** doing DSRP.

You are **already** & **always** doing DSRP.

Reality is **already** & **always** doing DSRP.

Metacognition is purposefully **using** DSRP
to organize information to adapt to reality.

When

WHAT YOU THINK

matches

WHAT IS REAL

the decisions you make work out as planned

L VE Reality

BIAS & MENTAL MODELS

Reality

You

Reality

You

Unaware of
Reality Bias

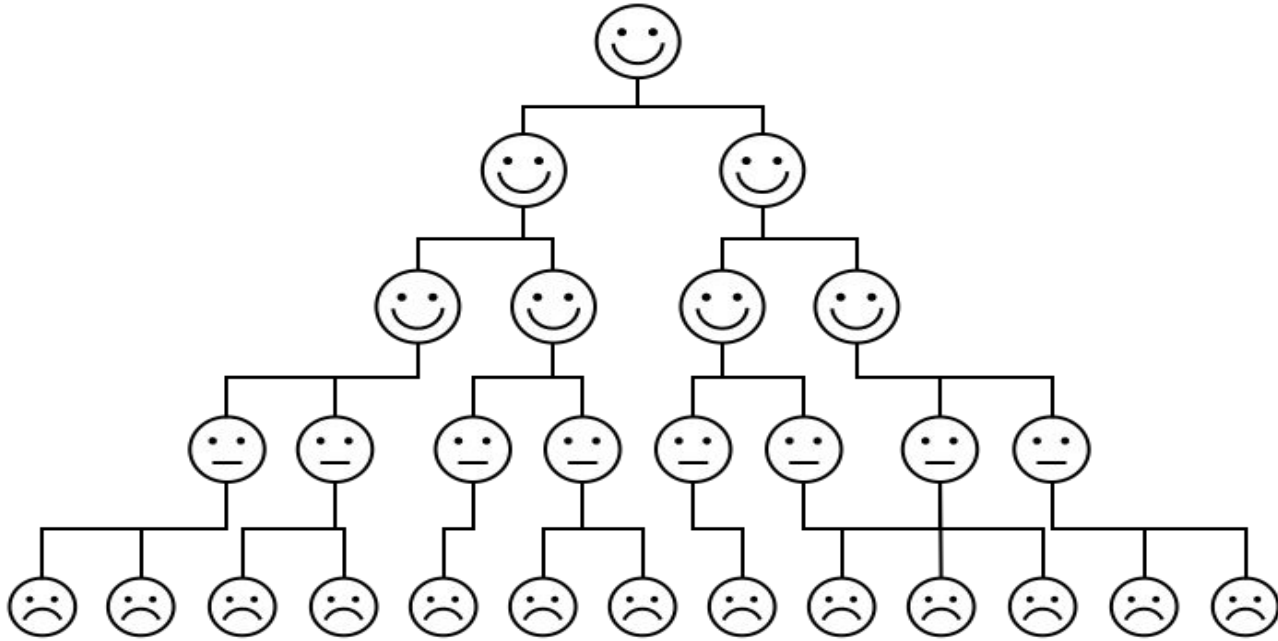

Mental Model

Reality

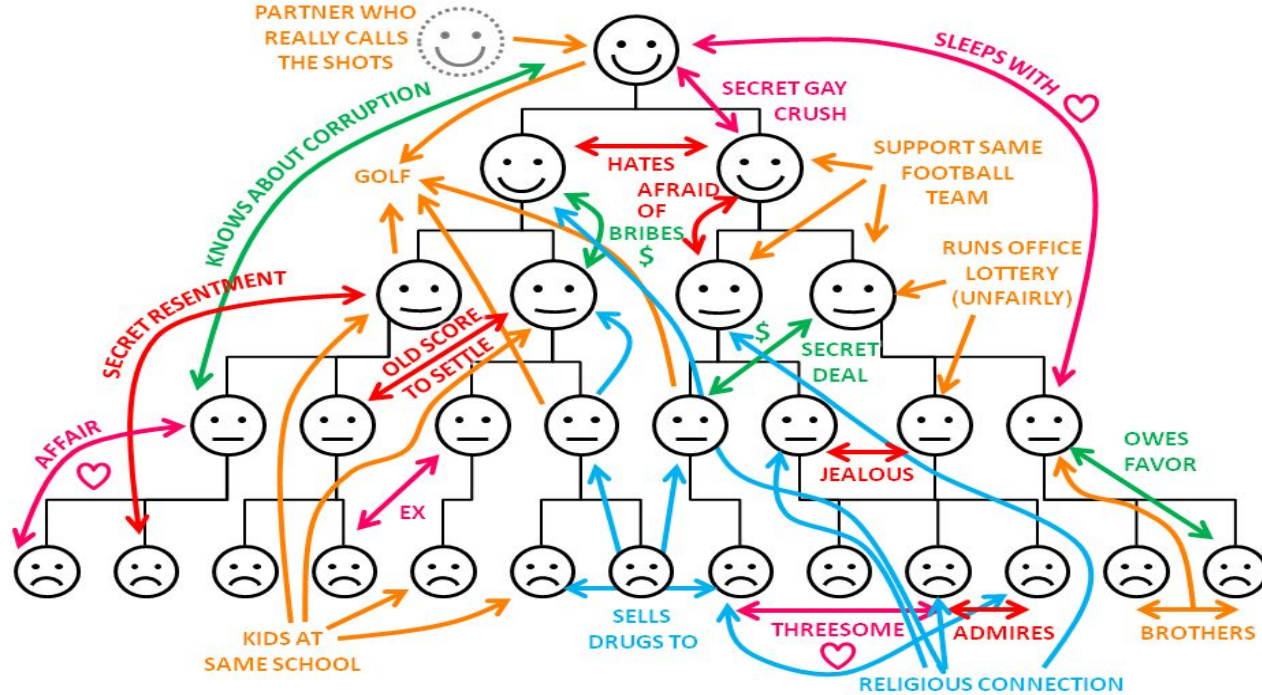

You

Aware of
Reality Bias

How we think the system is organized...

How the system is actually organized...

Mental Models

Aka. Meaning

**Real
world**

Test your model

**Mental
Models**

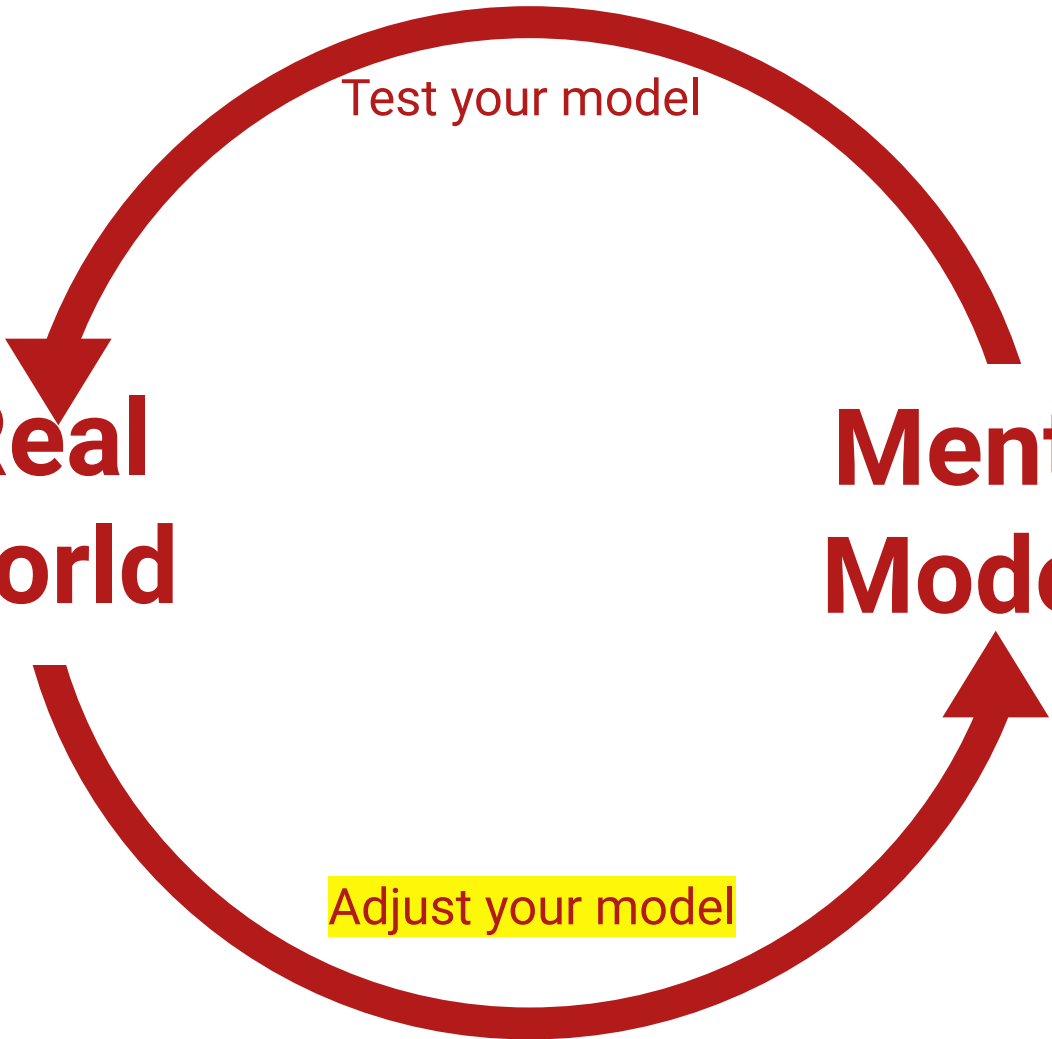

**Real
world**

Test your model

**Mental
Models**

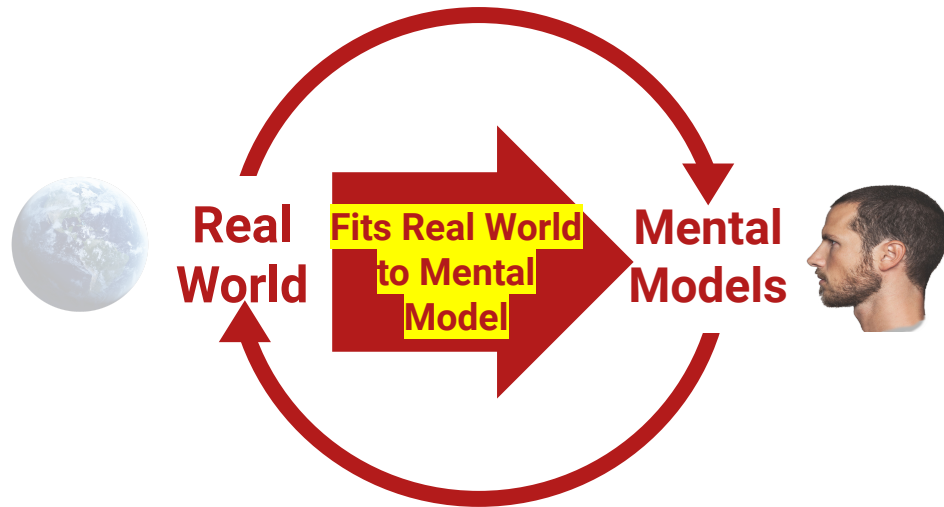

Adjust your model

“Say...what’s that mountain goat doing way up here in a cloud bank?”

**Real
world**

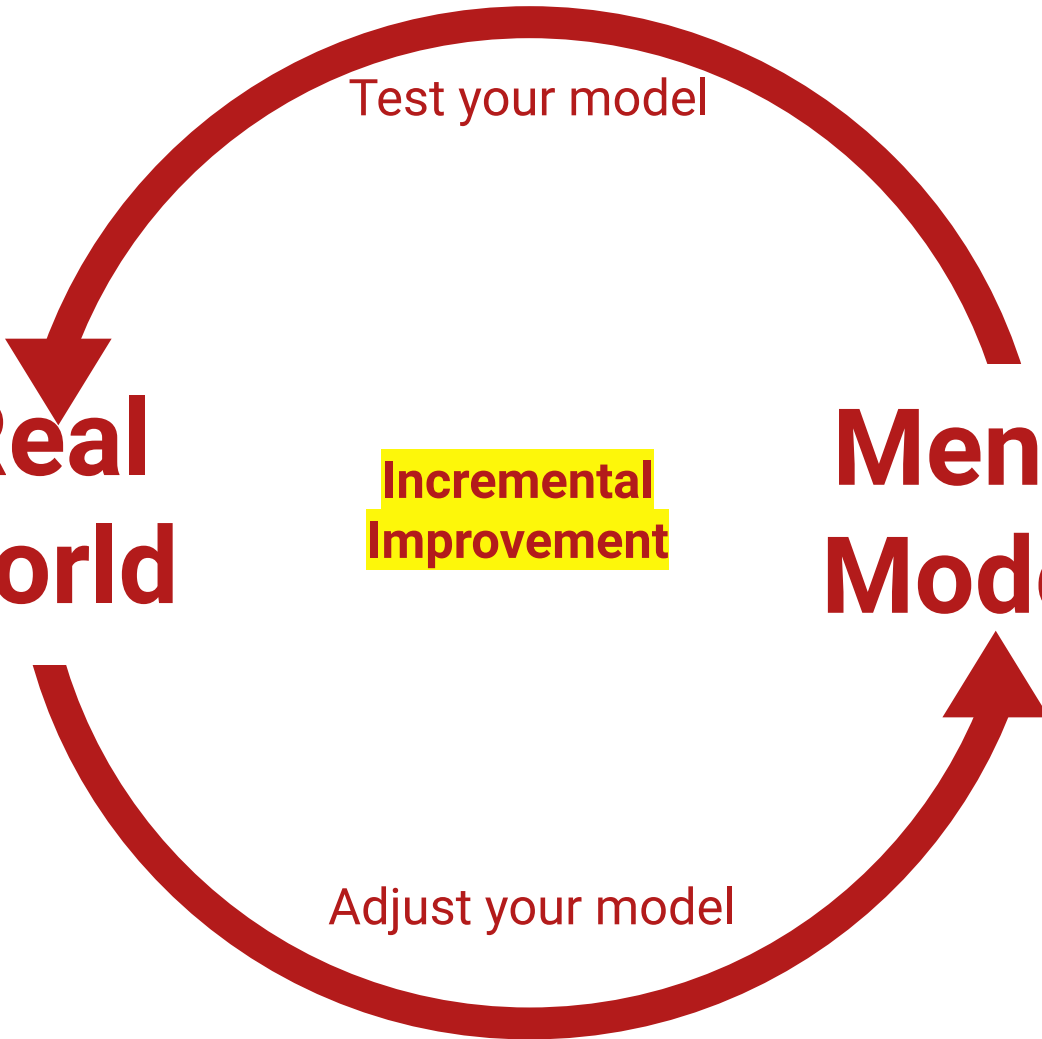

Test your model

**Incremental
Improvement**

**Mental
Models**

Adjust your model

REFLECTION

How do you think the simple act of recognizing your mental models will change you? How would it change your work place if everyone did?

Steps to Falling in Love with Reality

- 1. Be insatiably curious, understand systems before you solve problems**
- 2. Learn to Love mental models and recognize bias (DSRP Loop)**
- 3. Memorize DSRP Rules (4) and Elements (8)**
- 4. Develop a Daily Practice of DSRP Moves (start with top 5)**
